## SKILLS AND CERTIFICATIONS

**Technical Skills:** C/C++, Python, Node.js, React.js, MongoDB, REST APIs, Express.js, JavaScript, MySQL, Problem Solving (DSA)

**Certifications:** [Bits and Bytes of Computer Networking](#) Dec, 2023.  
[NPTEL Cloud Computing by IIT Kharagpur](#) April, 2024.  
[Complete 2024 Web Development Bootcamp](#) Aug, 2024.

## PROJECTS

|                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     |                              |

| <ul style="list-style-type: none"><li>Developed a real-time gesture and facial expression recognition system using Python, OpenCV, TensorFlow, and Matplotlib, achieving an accuracy rate of 92% and processing time of 20ms per frame.</li><li>Enhanced user experience by integrating advanced web browser features, leading to a 30% increase in user engagement and a 15% reduction in bounce rate.</li><li>Implemented emergency-triggered automated email notifications to ensure timely alerts, reducing response times by 40% and improving incident resolution efficiency by 25%.</li><li><b>Link:</b> <a href="https://github.com/gaaurav03/Hand-Face-Rapid-Response-System">https://github.com/gaaurav03/Hand-Face-Rapid-Response-System</a></li></ul>                                                                                                                                                   |                              |
| <b>GOFOOD (Food Ordering Website)</b>                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               | <b>OCT, 2024 - NOV, 2024</b> |
| <ul style="list-style-type: none"><li>Developed a full-stack food ordering platform using the <b>MERN</b> stack (MongoDB, Express, React, Node.js), implementing <b>CRUD operations</b> for managing users, orders, and menu items, with features like real-time order tracking, user authentication, and payment gateway integration.</li><li>Enhanced front-end performance by optimizing React components, reducing load time by 35% and improving user interface responsiveness.</li><li>Integrated an admin dashboard for restaurant management, allowing real-time updates on orders, menu, and customer feedback, improving operational efficiency by 20%.</li><li>Implemented secure user authentication and role-based access control, ensuring data protection and system integrity.</li><li><b>Link:</b> <a href="https://github.com/gaaurav03/GoFood">https://github.com/gaaurav03/GoFood</a></li></ul> |                              |

## ACHIEVEMENTS

- 200+** questions on **LeetCode (Rank – 4,12,339)**
- CTS Prodigy Hackathon (Top – 5** in college)

## EXTRA-CURRICULARS & RESPONSIBILITIES

**Responsibilities:** Core Team Member, Bash Craft Club, VITB, Jan 22  
Campus Ambassador, Mood Indigo IIT Bombay, Dec 22 – Apr 23

**Extracurricular:** Third Place in Football Tournament at VIT Bhopal AdVITya (Inter University Techno-Cultural Festival), 2022.  
CBSE Clusters Inter School Football Match Certificate
